

## ADVANTAGES

- ISO 10121-1:2014 tested media
- Available in a range of sizes
- Activated carbon impregnated to target ethylene oxide
- Able to be installed in any manufacturer's loose-fill filters

<b>Application</b>	Targets ethylene oxide. Used mostly for sterilization in the biopharmaceutical industry.
<b>Media</b>	Impregnated Activated Carbon
<b>Max Temperature (°C)</b>	40
<b>Min Temperature (°C)</b>	10
<b>Relative Humidity max</b>	40%-90%
<b>Installation Options</b>	All loose-fill molecular air filters.
